Summary:

Frontend developer with 3+ years of experience specializing in app development. Skilled in independently creating projects from scratch, maintaining existing apps, and crafting diverse landing pages. Experienced across marketing, product distribution, cybersecurity, and care services industries. Proactive in staying updated with emerging technologies and engaging in continuous learning. Strong communication skills in client interactions, ensuring project clarity and timely delivery. Additionally, easily accessible for B2B contracts.

Skills: Vue.js, Vuex, Nuxt.js, Pinia, JavaScript, HTML/CSS, SASS/SCSS, REST API, Firebase, Vite, Tailwind, Git, VS Code, Figma, Adobe XD, Gulp, Jira.

PROFESSIONAL EXPERIENCE

We Expert (01.2024 – present) Frontend Developer

Wroclaw, Poland

- Developed web app for Czech hostel Teplicka using Vue.js/Nuxt.js
- Optimized websites to improve performance, loading speed and user experience
- Directly managed project requirements and scheduled work with the customer

Stack: Vue.js, Nuxt.js

Grow Poland (11.2021 – 01.2024) Frontend Developer

Warsaw, Poland

- Developed and maintained 8 projects for clients during work in the company, the most interesting among them:
- [Viva cruises](#) (one of the main international cruises monopolists) - crafted high complex booking system and all features using only vanilla JavaScript
- [Grow International](#) - rebuild website from scratch as a result boosted visitor numbers by 56.7%
- [Orbico](#) - build a website from scratch for a leading European distributor of many well-known brands
- [LetMed](#) - created a website for a private medical assistant app from scratch

My portfolio: asya404.netlify.app

- [Sneakers app](#): crafted a sneakers shopping app utilizing Vue.js/Nuxt with a mock API backend. Implemented features such as sorting, search, favorites, and a basket system
- [Find a Therapist](#): engineered a therapist finding app with Vue.js and Firebase. Developed features for user-therapist interaction via requests and register/login functionality
